## ***SIGPRO Wireless Selected To Present As One Of Canada's Hottest Companies at The Canada IT Financing Forum***

### ***Flexium™ Introduced to Investors***

**Toronto, Ontario, Canada - 13 May 2002** - SIGPRO Wireless has been selected to present as one of Canada's hottest new information technology and Internet companies at the Canada IT Financing Forum. The Financing Forum now in its seventh year of operation, is the largest venture capital fundraising event in Canada. Canada's leading, up-and-coming companies from the wireless, semiconductor, e-commerce, networking, photonics, electronics, telecommunications and software sectors have been invited to present. Past presenters have gone on to raise hundreds of millions in venture financing, undertake successful IPOs or been acquired at substantial valuations.

SIGPRO Wireless will introduce its breakthrough architecture for 3G personal communication devices to leading North American venture capital organizations on May 14<sup>th</sup> at the 2002 Canadian IT Financing Forum. Investors from the United States will join dozens of Canadian venture capital investors for the two-day program at the Toronto Hilton. "We are absolutely delighted with the interest being shown in the Canadian IT Financing Forum this year by the US venture capital community. While we have had good support in the past, the turnout of US VC's in Toronto this year is outstanding and will establish a new record", stated Peter Standeven, co-founder of the event. "Having so many US VC's here at one time in Toronto at the Financing Forum represents a tremendous opportunity for the top Canadian IT and Internet companies to make some key connections and to build out their network of contacts". "Knowing that hundreds of companies apply to present at the IT Financing Forum, SIGPRO Wireless is delighted to be invited to present at such a high profile Canadian event," commented Dr. Sundara Murthy the founder and CEO of SIGPRO Wireless. "The 14<sup>th</sup> is going to be a very exciting day for SIGPRO Wireless, we present at the IT Financing Forum in the morning and leave for Europe that evening to introduce our System on Chip solutions to the European 3G players."

Founded in May 2000 by Dr. Sundara Murthy, SIGPRO Wireless is engaged in the development of critical System-on-Chip (SoC) and associated software solutions for next-generation wireless mobility Personal Communication Devices (PCDs). With a pioneering architecture, SIGPRO's programmable Flexium™ chip supports a variety of worldwide standards, data rates, protocols,

services and applications. With Flexium™ inside, the next generation wireless PCD will “empower the individual” with a multitude of personal communication (cellular phones), computation (palm computers), information (email, web devices), navigation (GPS), and entertainment (MPEG4, MP3) services. Flexium™ is leading the technology “Convergence” in PCDs to deliver “All-in-one” integrated services to people on the move.
